SKILLS

Python

Machine learning

Deep learning

Sciket-learn

Pandas

Data Structures

SQL

Flask

Tensorflow

INTERESTS

Music

Reading

EDUCATION

B.TECH CSE (AI & ML)

Sharda University

08/2018 - 06/2022

High School

Nav Uday Convent

04/2016 - 04/2018 *12th class percentage: 85.2%*

Courses

- Science

PROJECTS

Flight Fare Prediction (01/2021 - 02/2001)

- This is a application and it is a machine learning project. The outcome of this project is to predict the fare of flights.
- Keywords: Python, Machine Learning, Flask, Sciket-learn, Jupyter Notebook.

Cotton Disease Classification (02/2021 - 03/2021)

- This is a web application and it is a deep learning project. The outcome of this project is to classify whether a cotton leaf has any disease or not.
- Keywords: Python, Deep Learning, Flask, Tensorflow, Google Colab.

Rain Fall Prediction (04/2021 - 05/2021)

- This is a web application and it is a machine learning project. The outcome of this project is to predict whether rain will come tomorrow or not.
- Keywords: Python, Machine Learning, Flask, Sciket-learn, Jupyter Notebook.

Traffic Sign Recognition (05/2021 - 06/2021)

- This is a web application and it is a deep learning project. The outcome of this project is to recognize the traffic sign images. It will help drivers to take the appropriate decisions while driving.
- Keywords: Python, Deep Learning, Flask, Tensorflow, Google Colab.

Customer Churn Analysis (07/2021 - 08/2021)

- This is a web application and it is a deep learning project. The outcome of this project is to predict whether a customer will churn in future or not. After knowing the customers who will churn, we can recommend something new to make them not to churn.
- Keywords: Python, Machine Learning, Flask, Sciket-learn, Jupyter Notebook.

CERTIFICATES

Workshop on Machine Learning (03/2020)

Machine Learning A Problem Solving Approach (K-NN) (05/2021)

P2P LEARNING PROGRAMME ON PYTHON (05/2021 - 06/2021)
